

MAP NOTES
 The Governor requested and the Alaska State Legislature appropriated to the Department of Community and Regional Affairs (DCRA) funding for the community map shown hereon. DCRA contracted with R&M Consultants, Inc. in February, 1994 to design and prepare the map.

This map is based on an orthophotograph prepared from aerial photography taken in November, 1991 by AeroMap U.S. The orthophoto is an aerial photograph which has been corrected (rectified) by removing the distortions present in the original photographs; distortions can result from aircraft tilt and from changes in ground elevation.

This map should not be construed as a survey. On-site surveys should be conducted prior to engineering or construction.

Property and utility information has been generated from the best available sources with limited accuracy checks. Generally the information is current as of May, 1994.

Electric and telephone systems consist of primary and secondary cables and service lines. The systems shown here are simplified for clarity.

The Emmonak Corporation lands are subject to the requirements of section 14(c) of the Alaska Native Claims Settlement Act (ANCSA). The Corporation is required to convey land for primary places of residence, business, subsistence campsites, reindeer husbandry headquarters and airports that were occupied or used as of December 18, 1971, as well as land occupied by non-profit corporations. Improved community land and land necessary for community expansion, rights of way, and other foreseeable community needs are to be conveyed to the City of Emmonak.

FLOOD DATA
 The U.S. Army Corps of Engineers (C.O.E.) has established flood data for this community. This project located the C.O.E. flood staff gauge for which the C.O.E. has published flood data on an assumed datum.

The C.O.E. flood staff (C.O.E.#1) is located on the northeast corner of the City Complex Building. The following table compares the relationships of the C.O.E. assumed elevations for flood data correlated to surveys made for this map (approximate Mean Sea Level from ADOT/PF Airport plans).

NAME	C.O.E.	Approx. M.S.L.
Flood of Record (1989)	4.2	19.4
Recommended Building Elev.	5.2	20.4
